

End of Day (EOD) Report

Date: 1st July, 2026-----6th July, 2026

Name: M. Abdullah Asim

Accomplishments

- Performed a research analysis on Stuxnet malware attack and the 2007 Estonia DDoS Cyberattack.
- Revise and learn Linux fundamentals and commands.
- Learn how to configure VMs in an isolated host-only network communication.
- Create a Github account, create a new repository and link it to git on Ubuntu VM.

Challenges

- Linking the Github account required installing some missing requirements and having better knowledge.
- Ubuntu VM has a black screen issue when going to sleep. Seems to be a compatibility issue.

What's Next

- Continue revising more Linux commands to satisfaction.
- Understand how to use Github more effectively.
- Begin steps towards Linux hardening on Ubuntu.
- Look up and learn what are application servers and web servers (like apache).

Status

Currently working on improving my knowledge and skills in using Linux and moving forward towards Linux hardening.

Regards,

M. Abdullah Asim
