

End of Day (EOD) Report

Date: 17th July, 2026

Name: M. Abdullah Asim

Accomplishments

- Complete setup of Wazuh log management system.
- Setup a couple of Wazuh agent for testing system.
- Configure rules on wazuh agent for generating log alerts.
-

Challenges

- Wazuh setup was previously split among three separate systems, which led to complications and issues in network connections.
- Solution: We shifted to implementing all three components on a single Ubuntu server VM. This allows for more efficiency in configuration.

What's Next

- Solve the issue with indexing alerts for wazuh logs.
- Create alert generation for Wazuh logs.

Status

Completed today's tasks

Regards,

M. Abdullah Asim
